

How to use the UNHCR ArcGIS Pro template

The screenshot displays the ArcGIS Pro interface with the UNHCR template. The main map shows a map of the Middle East with various geographical features and labels. The interface includes several panes and toolbars:

- Header:** Contains the Project, Layout, Insert, Analysis, View, Imagery, Share, and Format tabs. A callout points to the Header with the text: "Tools and settings in the Header".
- Contents pane:** Located on the left, it lists the map elements in the Drawing Order: A4L_geoservices, Scale Bar, Legend, HEADER, Globe Frame, Disclaimer, Map Frame, and Footer. A callout points to this pane with the text: "Contents pane all the key group of map elements such as the Main Map Frame, Globe Frame, Disclaimer, Legend, etc."
- Catalog pane:** Located on the right, it shows the Project, Portal, and Favorites views. A callout points to the Catalog pane with the text: "One ArcGIS Pro template now can contain multiple Maps and Layouts".
- Map Frame:** The central map area displays a map of the Middle East with various geographical features and labels. A callout points to the Map Frame with the text: "The template is based on core_v2 geoservices. All the maps, layouts, and all the necessary layers are stored under one ArcPro map project."

Additional callouts and text include:

- "One ArcGIS Pro template now can contain multiple Maps and Layouts" (pointing to the Catalog pane).
- "The template is based on core_v2 geoservices. All the maps, layouts, and all the necessary layers are stored under one ArcPro map project." (pointing to the Catalog pane).

Most titles , dates and file names in the layout are automated text that reflect the values from the Metadata/Layout Properties
